```
import processing.net.*;

ovServer = new Server(this, 6000);

within draw()

{
  Client aClient = ovServer.available();
  if (aClient != null) {
    if (aClient.available() > 0) {
      parse(aClient.readStringUntil(10)); // execute command...
    }
  }
}
```

```
parse
```

```
void parse(String message) {

  if (message != null) {

    println(message);
  }
}

=====
```

```
ipstim=tcpip('localhost', 6000, 'NetworkRole', 'client');
fopen(ipstim);

fprintf(...)
```

```
